SUMMARY

Flutter developer with 2+ years building and shipping cross-platform mobile apps, including a live App Store e-commerce launch. Works end-to-end as the only Flutter developer on a cross-functional team — Clean Architecture, state management, Firebase/Supabase, in-app purchases, and white-labelling.

EXPERIENCE

Flutter Developer — Leggera Techs (Remote) March 2025 – Present

- Only Flutter developer on a cross-functional team, owning four apps end-to-end — from architecture and development to testing and iOS/Android store deployment.
- Built and launched Misimu, a live e-commerce app on the App Store, covering product browsing, cart, and checkout.
- Developed a white-label laboratory app for chemists and customers, building a configurable white-labelling system and a custom flavors module.
- Built an ebook and audiobook platform with in-app purchases and subscription plans for one-time purchase and subscriber access.
- Partnered with the QA team across testing phases to stabilize releases before each launch.

Freelance Flutter Developer — Remote April 2025 – October 2025

- Built Stretchout, a stretch-reminder app for remote workers, with scheduled reminders and guided movement instructions.
- Designed and shipped Selsal, a real estate app for the KSA market that lets buyers track construction and handover progress on their properties.

AI Instructor — iSchool (Project-based) November 2024 – January 2025

- Taught AI concepts to classes of 20 students through hands-on, project-based lessons.

Flutter Developer — Pyramakerz Tech, Alexandria January 2024 – July 2024

- Built a Flutter educational app for children aged 3–6 teaching Arabic/English phonics and math, connected to a physical robot over MQTT for real-time interaction.
- Integrated Firebase for authentication, cloud data storage, and daily push notifications.
- Architected the app with MVVM and Cubit state management for clean separation of UI, business logic, and data layers.
- Collaborated with designers to translate Figma designs into responsive UI, and optimized performance ahead of release.

ROV Student Team, Alexandria January 2021 – August 2022

Software Engineer, promoted to Chief Technology Officer (student team)

- Promoted to CTO of the robotics team after completing the software training track.
- Developed image-processing software for underwater ROV navigation and built a VR demo of the ROV in Unity.
- Contributed to the team's bonus achievement at the MATE ROV international competition.

TECHNICAL SKILLS

Languages: Dart, Python, Java

Mobile / Flutter: Flutter, State Management (BLoC/Cubit, Riverpod, GetX, Provider), Firebase, Supabase, REST APIs, GraphQL, MQTT, Local & Push Notifications, In-App Purchases & Subscriptions, Hive, Isar, Animations, Responsive UI, Localization (Arabic/English), White-labelling

Architecture: Clean Architecture, MVVM, SOLID, OOP

Tools & Delivery: Git, GitHub, Postman, Android Studio, VS Code, App Store & Google Play deployment

EDUCATION

BSc Computer Science (Dual Degree) 2019 – 2023

Arab Academy for Science & Technology, Egypt • University of Northampton, UK • GPA 3.61/4.0 (First-Class Honours)

CERTIFICATIONS

Mobile Application Development — DEPI (Digital Egypt Pioneers Initiative) 2024

Flutter Development Diploma — AMIT, Alexandria 2023

AWARDS

- MATE ROV Competition — Best Engineering Presentation; Best Programming & Image Processing (2022)
